

noxvera List Submission Requirements

Version: v1.0 (25 July 2025)

1. General

1.1) Maps near the bottom of the list do not need any video proof due to how easy they are. Anything below “dislike this level” (ID: 60773051) meets this criteria.

1.2) Using any skips or secret ways is allowed.

1.3) Records set before the current submission requirements were implemented are exempt from this (see version date).

1.4) If something isn't listed here, you should probably use common sense to figure out if it is allowed or not.

2. Gameplay

2.1) Record must be achieved without using hacks. The game should behave the same as Vanilla. (CBF is allowed)

2.2) Record must be achieved on the latest game version.

2.3) You cannot modify the map and must play the version listed on the website.

2.4) If using a mod menu, a cheat indicator must be visible.

2.5) If using a mod menu, a CPS counter must be used.

2.6) Using smooth fix to speedhack is not allowed.

2.7) Using a texture pack to significantly change icon size is not allowed.

3. Video

3.1) The recording must be permanently available and viewable.

3.2) The recording must include audible clicks.

3.3) Unless completed on the first attempt, the recording must show the entire previous attempt death animation.

3.4) The recording must show the entire completion attempt.

3.5) The recording must show the entire ending animation sequence.

These rules are not absolute and should be treated as general guidelines. They are subject to change at any time.
